## Covers for All Seasons

If your sleep has ever been interrupted because you are too hot or too cold, you already understand that your body temperature in bed is fundamentally important for a restful, healthy sleep. All wool fillings in SAMINA bedding are, without exception, made from the purest virgin sheep's wool and covered with certified organic fabric. The virgin sheep's wool selected by SAMINA is wholly from free-roaming, pesticide-free, living sheep and is completely hand-processed: hand-shorn, hand-washed, hand-combed into layers. This

careful and tedious method ensures the purest wool to optimize its performance as one of the best all-round fibers for any climate. Its extraordinary ability to absorb around 30% of its own weight in moisture which then evaporates into the surrounding air makes your bed a warm, dry, cozy place. SAMINA duvets are available in an almost endless variety of sizes yet only a few simple styles that correspond to the climate as their names suggest:

### Midsummer Night Dream Duvet

The lightest duvet, this one is ideal for climates with year-round warmer temperatures or for very hot summer nights. It may be used alone or, when it is colder, in combination with the Spring/Autumn duvet to make it a Four Seasons duvet.

### Summer Duvet

A light and airy duvet almost twice as heavy as the extra-light Midsummer Night Dream duvet is perfect for warm summer months and more temperate climates.

### Spring/Autumn Duvet

As the name suggests, when temperatures are transitioning from cold to cool in the Spring or from warm to cool in the Fall, this duvet is thicker and double the weight of the Summer duvet. The additional filling of virgin sheep's wool helps balance your body temperature in bed keeping you nice and cozy as the temperatures get cooler.

### Four Seasons Duvet

There is no Four Seasons duvet, per se. Instead, a Four Seasons duvet is created by combining either the Midnight Summer duvet with the Summer duvet or the Summer duvet with the Spring/Autumn duvet. Every duvet comes with several ties on the side (invisible when inside of a duvet cover) that are simply tied together to create a Four Seasons duvet. Which combination is right for you, depends on your climate, the length and severity of your winter months or your own personal preference as the combination with the Spring/Autumn duvet results in a much heavier cover.
